

Making a difference in the comfort of your home

WELCOME

Tell us what you need because we listen!

At **Allied Nursing Services, Inc.**, we don't mechanically provide you with care services you require at home. We do more than that. Being in this profession is a challenge for us to be the answer to the changing needs of those clients we serve. We understand that every family has different needs. For us to zero-in on your specific care requirements, we must do more than nursing care and companionship. As a start, we evaluate your needs at home. A registered nurse from **Allied Nursing Services, Inc** will be happy to visit your home and conduct an assessment. In this way, we are able to create a more specialized care plan for you or your family member at home.

There are many aspects to nursing care and providing care for clients during their most fragile health conditions. While there are many things to consider, we find that there is only one guiding principle that we need to keep our focus on. This guiding principle is the foundation from which the **Allied Nursing Services, Inc** stands. We are strongly guided by Quality.

Making a difference in the comfort of your home

ABOUT US

The Allied Nursing Services Tradition

For many years, we have helped individual clients and families manage different health issues. We take care of those recovering from surgery, illness, injury as well as new mothers who have recently given birth. We have specialized nursing care services that will answer to different needs. At **Allied Nursing Services, Inc**, we continue a tradition of quality care that we invite you and your loved one to experience firsthand.

Our Care Philosophy

Grounded on ethics, we provide treatment and care services to our clients in their homes. We make the home environment a safe and comfortable place to spend recovery, retirement and daily living in. Our approach to care is direct and simple. We realize that what most people need at home is not for someone to tell them what to do. We give you your freedom of healthcare choice. You decide what home care service you will get and how it will be delivered to you. Our job is to listen. We listen to your needs and our duty is to respond to those needs with the goal to preserve your health and wellness at home.

Your Health and Allied Nursing Services

Improve the way you live at home. There are many care options available for you. We provide personal care, companionship and hourly care. For family care givers, we offer respite care so they can take their much needed break from daily responsibilities. At Allied Nursing Services, Inc, your health is the priority.

OUR SERVICES

Here are the services we offer:

Support for Daily Living Tasks (Hygiene Assistance)

Hygiene assistance is a part of the main service we provide - Assistance with Daily Living Tasks. We give you the support you need for grooming, bathing, dressing and even clothing selection. You get all the assistance you need to ensure that your daily hygiene is attended to with the appropriate attention.

Light Housekeeping

Our caregivers/homemakers will take care of most household tasks such as: making the bed, laundry services, changing linens, etc.

Running Errands and Shopping

We can assist you in sorting the mail, going to doctor's appointments and general errands you need to do on a weekly or daily basis. We also make sure you don't run out of supplies at home by helping you do grocery shopping.

Live In, Live Out, Sleep-Over

At **Allied Nursing Services, Inc**, we are flexible with our schedules. We can provide a caregiver/companion to take care of you on hourly, overnight, daily or weekly service timeframes.

Respite Care

If you are the primary family caregiver, most responsibilities will fall on you. However, even the most compassionate of family members will need their breaks too. At **Allied Nursing Services, Inc**, we give you a chance to recharge for the day, weekend or for several days while we take over your responsibilities as caregiver of your home and loved one.

Companionship

We can assign a companion to keep them company while you run errands, go to school or report for work. A companion will be present at home and will be able to respond to your loved one's care needs.
